Subject: Gold King Mine Release Incident

Good afternoon Kay.

Thank you again for giving Justin Lawes the opportunity to present CWater Solutions technology at the last RRT IX meeting. We also enjoyed the good conversation at the end of the meeting.

Our company **has extensive experience in the area of mine leachate treatment and we would like to explore further how we may be able to assist in the Gold King Mine release response?**

Would you be able to help us connect with with appropriate people involved in the incident?

Best regards,

John
